

JOHN ALFRED E. MARTINEZ

Bachelor of Science in Computer Engineering

09352245705 | johnalfred071703@gmail.com | Norzagaray, Bulacan, Philippines

ABOUT ME

Results-driven Computer Engineering graduate with experience in full-stack web development, mobile app development (Flutter/Firebase), IoT system integration, and software quality assurance. Proven academic excellence and hands-on internship experience. Adept at bridging hardware and software, with strong problem-solving skills and a passion for building reliable technology solutions.

EDUCATION

Polytechnic University of the Philippines – Sta. Maria Campus | 2022 – 2026

Bachelor of Science in Computer Engineering (Transferred from STI Sta. Maria, 2021–2022)

ACHIEVEMENTS

STI: Dean's Lister – 1st Year 1st & 2nd Semester

PUP: President's Lister – 2nd Year 1st Sem | Dean's Lister – 2nd Year 2nd, 3rd Year 1st & 2nd, 4th Year 2nd Sem

ON-THE-JOB EXPERIENCE

Web Development Intern – Hooli Software (300 Hours)

- Completed entry-level programming tasks including feature development, bug fixing, and UI implementation.
- Collaborated with developers to meet client requirements and improve application performance.

Web Development & Quality Assurance Intern – Highly Succeed Inc. (300 + 300 Hours)

- Developed web features and performed entry-level programming tasks under senior developer supervision.
- Conducted regression, sanity, and test case creation as part of the QA cycle; tracked and reported defects.

CAPSTONE PROJECT

ChickTech – IoT-Based Poultry Monitoring, Automated Watering & Feeding System (Project Leader)

- Led end-to-end development of an IoT system integrating Arduino/ESP32 sensors with a Flutter + Firebase mobile app for real-time environmental monitoring and automated control.
- Managed team coordination, circuit design, hardware-software integration, and system testing.

Technologies: Flutter, Firebase, Arduino, ESP32, IoT Sensors, Figma

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, Firebase, JavaScript, HTML/CSS, Java

Hardware & IoT: Arduino, ESP32, circuit design, sensor interfacing, hardware-software integration

QA: Regression testing, sanity testing, test case creation, defect tracking

Tools: Figma, VS Code, Android Studio

Soft Skills: Time Management, Adaptability, Attention to Detail, Initiative, Team Leadership

CERTIFICATIONS

WDEtm – Certified Entry-Level Web Developer Certification
